Hammad Ali

Full Stack Software Engineer

ch.hammad2914@gmail.com · hammad-shahid.vercel.app · +92 349 187 2526 · Karachi, Pakistan

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of hands-on experience building and shipping scalable ERP, SaaS, and supply-chain systems using React.js, Next.js, Node.js, NestJS, and PostgreSQL. Consistently owned end-to-end delivery across 7+ production systems — from frontend architecture and API design to AI integration and production deployments. Proven in migrating legacy systems, handling 50,000+ row datasets in real-time, and establishing reusable patterns that cut per-module development time by 30%.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, AG Grid, TailwindCSS, React Native

Backend: Node.js, Express.js, NestJS, .NET Core, .NET Web API, Prisma ORM, REST APIs, WebSockets (Socket.io)

Databases: PostgreSQL, SQL Server, MongoDB

DevOps & Tools: Docker, Redis, CI/CD, Git, GitHub, Performance Optimization

AI Integration: Azure Document Intelligence, Gemini AI, Bulk PDF extraction & automation pipelines

PROFESSIONAL EXPERIENCE

Interactive Technologies Gateway | Software Engineer | May 2023 – Present

- Developed and shipped full-stack features across 7+ enterprise ERP systems for international clients in supply-chain and quality inspection, working across React/Next.js frontend to Node.js/NestJS backend APIs.
- Designed and built scalable backend APIs using NestJS and Prisma ORM, implementing authentication, RBAC, and complex business logic for multi-module ERP platforms.
- Migrated 3 legacy VB.NET systems to modern React + Node.js + PostgreSQL — reduced UI load times by 40% and significantly cut maintenance overhead.
- Built Excel Genie, a full-stack reporting engine reused across 10+ ERP modules — eliminated duplicate reporting code and saved hundreds of developer hours.
- Engineered AG Grid implementations handling 50,000+ row datasets with real-time WebSocket synchronization — zero UI lag with live data consistency across modules.
- Created reusable React component libraries and NestJS service patterns adopted across multiple products — cut per-module development time by 30%.
- Independently shipped Node.js/NestJS production endpoints and Docker-based services with CI/CD pipelines from development through to production.

KEY PROJECTS

Cortex — AI-Powered ERP System | *React.js · NestJS · PostgreSQL · WebSockets · Azure Document Intelligence*

- Built an AI-powered ERP with 8 interconnected modules with complex admin panels, permission flows, and real-time 50,000+ row data grids.
- Built an AI bulk PDF extraction pipeline using Azure Document Intelligence — trained custom models for 8–12 client document formats, eliminated manual data entry, and reduced processing time by 70%.

Integra — Quality Inspection Platform | *React.js · Node.js · WebSockets · PDF Generation*

- Built 7 end-to-end inspection workflows with multi-stage approvals, real-time WebSocket updates, automated PDF generation, and live KPI dashboards.

PPWR — EU Packaging Compliance SaaS | *React.js · .NET Core · SQL Server*

- Developed a multi-client SaaS compliance platform for EU PPWR regulation with multi-role admin structure, .NET Core backend, and React frontend across multiple compliance modules.

OCULAS — Vendor Portal | *Next.js · Node.js · PostgreSQL · PDF Automation*

- Built an automated vendor portal with PDF extraction, invoice/debit note generation, and a document management system processing 10,000+ documents/year — reduced manual effort by 70%.

EDUCATION & CERTIFICATIONS

BS Software Engineering — Virtual University of Pakistan | Oct 2023 – Oct 2027

MERN Stack Development — Jawan Pakistan | Jan–Jun 2023

Frontend Development — Jawan Pakistan | Jun–Dec 2022
