KEY PROJECTS

Cortex - AI-Powered ERP System | React.js, NestJS, PostgreSQL, WebSockets, OpenAI, AG Grid

- Led full-stack delivery across 8 interconnected modules with admin panels, permission flows, and 50,000+ row live grids.
- Built a bulk PDF extraction pipeline on OpenAI with per-client templates and human review before commit: 70% faster document processing.

Okulium - School Management SaaS (live) | React, Vite, NestJS, Prisma, PostgreSQL, PWA

- Multi-tenant platform for school groups: attendance, exams, fees, timetabling, staff and reporting, as an installable PWA.
- Attendance edits write to an edit-history table and result disputes are a separate model, so corrections stay auditable.

Integra - Quality Inspection Platform | React.js, Node.js, PostgreSQL, WebSockets, PDF Generation

- Built 7 inspection workflows with approvals as a state machine, real-time updates, server-side PDF reports, and KPI dashboards.

Law in Action - Global Regulations Platform (live) | React, Express, Prisma, PostgreSQL

- Subscription compliance platform with regulation tracking, HS-code classification over the 10,300-entry UN Comtrade set, and a metered API clients pull into their own ERPs.
- Translation falls back automatically across DeepL, Azure, Google and MyMemory, so one provider's outage never stalls the work.

Vendor Portal - Supplier Invoicing | Next.js, Node.js, PostgreSQL, PDF Automation

- Direct supplier uploads with automated extraction and validation before commit: 10,000+ documents a year, 70% less manual effort.

HotelKey - Hotel & Guest Services App (client demo) | React Native, React Navigation
