Hammad Ali

Full Stack Software Engineer

ch.hammad2914@gmail.com · hammad-shahid.vercel.app · +92 3491872526 · Karachi, Pakistan

PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 3+ years of experience designing and delivering scalable enterprise-grade ERP, SaaS, and supply-chain systems using React.js, Next.js, Node.js, and PostgreSQL. Excelled at leading end-to-end development for 7+ production systems including frontend architecture, backend API development, real-time data solutions, and production deployments. Proven in migrating legacy systems, optimizing high-volume datasets (50,000+ rows), integrating AI-powered features, and implementing reusable architectures that significantly accelerate delivery and reduce maintenance.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Redux, Zustand, AG Grid

Backend: Node.js, Express.js, Nest.js, Prisma ORM, REST APIs, WebSockets (Socket.io), JWT Auth

Databases: PostgreSQL, MongoDB, MySQL

DevOps & Tools: Docker, Redis, CI/CD, Git, GitHub, Code Reviews, Performance Optimization

AI Integration: Gemini AI integration, Bulk PDF extraction & automation pipelines, AI-powered ERP modules

PROFESSIONAL EXPERIENCE

Interactive Technologies Gateway

May 2023 – Present

Software Engineer

- Led full-stack development and architecture for 7+ enterprise ERP systems serving international clients in supply-chain and quality inspection domains.
- Designed and implemented backend APIs and services using Node.js/Nest.js and Prisma, while leading frontend architecture in React/Next.js.
- Migrated 3 legacy VB.NET systems to modern full-stack React + Node.js + PostgreSQL architecture, reducing UI load times by 40% and maintenance overhead.
- Built and owned Excel Genie, a dynamic full-stack reporting engine reused across 10+ ERP modules. Eliminated redundant development and saved hundreds of developer hours.
- Engineered high-performance AG Grid solutions handling 50,000+ row datasets with real-time WebSocket synchronization, ensuring zero UI lag and fresh data across frontend and backend.
- Developed reusable component libraries and backend service patterns adopted across multiple modules, reducing per-module development time by 30%.
- Collaborated on system design and independently built/deployed multiple production Node.js/Nest.js endpoints and Docker-based services with CI/CD pipelines.

KEY PROJECTS

Cortex — AI-Powered ERP System | *React.js · Nest.js · PostgreSQL · WebSockets · AI*

- Led full-stack frontend and backend contributions for an AI-powered ERP platform managing 50,000+ row grids with real-time updates across 8 interconnected modules.
- Designed and implemented AI-powered bulk PDF extraction pipeline for invoices and purchase orders using Gemini AI — eliminated manual data entry and reduced processing time by 70%.

Integra — Quality Inspection Platform | *React.js · Node.js · WebSockets · PDF Generation*

- Led full-stack development of 7 inspection workflows with multi-stage approvals, real-time WebSocket updates, and automated PDF generation.
- Built live KPI dashboards and backend services that improved quality oversight and significantly reduced quality escapes.

Taskify — Multi-Tenant SaaS Project Management | *React.js · Express.js · Socket.io · JWT · PostgreSQL*

- Built full-stack multi-tenant SaaS platform with secure JWT authentication (refresh rotation, HttpOnly cookies) and 3-tier RBAC, ensuring zero cross-tenant data leaks.
- Engineered real-time task management system with Socket.io, 5-state machine logic, and immutable deadline enforcement.
- Integrated Gemini AI for automated report generation with sub-3-second response times.

OCULAS — Vendor Portal | *Next.js · Node.js · PostgreSQL · PDF Automation*

- Built smart vendor portal with automated PDF extraction and invoice/debit note generation — cut manual work by 70% and processing time by 50%.
- Implemented centralized document management system with automated workflows handling 10,000+ documents/year and improving accuracy by 60%.

EDUCATION

Bachelor of Software Engineering *Oct 2021 – Oct 2025*
Virtual University of Pakistan

CERTIFICATIONS

MERN Stack Development *Jan 2023 – Jun 2023*
Jawan Pakistan

Frontend Development *Jun 2022 – Dec 2022*
Jawan Pakistan
