HAMMAD ALI

Full Stack Software Engineer

React · Next.js · TypeScript · NestJS · .NET Core · PostgreSQL

Karachi, Pakistan | +92 349 187 2526 | ch.hammad2914@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Software Engineer with **3+ years** delivering enterprise ERP, SaaS and supply-chain platforms across the full development lifecycle, working in React, Next.js, TypeScript and NestJS. Owned end-to-end delivery across **7+ production systems**, migrated 3 legacy systems to a modern stack, and built a document extraction pipeline that cut processing time by **70%**. Experienced in requirements analysis, testing, code review, production support and mentoring junior developers.

EXPERIENCE

Software Engineer

May 2023 - Present

Interactive Technologies Gateway

- Own end-to-end delivery across **7+ enterprise systems** for supply-chain and quality-inspection clients, from React/Next.js frontends to Node.js/NestJS APIs.
- Design backend APIs in NestJS and Prisma ORM covering authentication, role-based access control and multi-module business logic for ERP platforms.
- Migrated **3 legacy VB.NET systems** to React + Node.js + PostgreSQL, cutting UI load times by **40%**.
- Built Excel Genie, a reporting engine reused across **10+ ERP modules** in place of per-module reporting code.
- Engineered AG Grid interfaces over **50,000+ row datasets** with real-time WebSocket synchronization and no UI lag.
- Created reusable React component libraries and NestJS service patterns, cutting per-module development time by **30%**.
- Ship production endpoints and Docker-based services independently through CI/CD pipelines.
- Write unit and integration tests with Vitest, and run code reviews across the team before work is merged.
- Own requirements analysis, estimation and planning for assigned modules, working directly with business stakeholders.
- Mentor **4 junior developers** in application architecture, debugging and code quality.
- Investigate and resolve production issues across frontend, API, database and deployment layers.

Cortex AI-Powered ERP System | React.js, NestJS, PostgreSQL, WebSockets, OpenAI, AG Grid

- Led full-stack delivery across **8 interconnected modules** serving **100+ users** across 7+ permission roles, with admin panels, permission flows and real-time data grids.
- Built a bulk document extraction pipeline on the OpenAI API covering 8-12 client document formats, with human review before anything is committed, cutting processing time by **~70%**.

Integra Quality Inspection Platform | React.js, Node.js, PostgreSQL, WebSockets, PDF Generation

- Built **7 end-to-end inspection workflows** with multi-stage approvals, real-time status updates, automated PDF reports and live KPI dashboards.
- Modelled the full reporting hierarchy for **50+ inspectors** through their managers and department head, including finance sign-off on conveyance claims.

Vendor Portal Supplier Invoicing | React, .NET Core Web API, SQL Server, PDF Automation

- Replaced emailed supplier PDFs with direct uploads, automated extraction and validation before commit: **10,000+ documents a year** and **70% less manual effort**.
- Automated the path from extraction through to logistics invoice and debit note generation, with human verification before any document is issued.

Full Stack Developer (Remote)

Jun 2025 - Feb 2026

Consulting Service International Ltd

- Built client websites and web portals in React and Next.js, working remotely from requirements through to deployment.
- Delivered full-stack client work end to end, pairing React and Next.js front ends with Express APIs over PostgreSQL.

Law in Action Global Regulations Platform | React, Express, Prisma, PostgreSQL — lawintoaction.com

- Built a live subscription platform where member businesses see the regulations that apply to them, the penalties attached and the recommended next steps.
- Added HS-code classification across the **10,300-entry** UN Comtrade dataset, and a metered API that lets client businesses pull regulation data into their own ERP systems.

PERSONAL PROJECTS

Okulium Multi-Tenant School Management SaaS | React, Vite, NestJS, Prisma, PostgreSQL, PWA okulium.pk

- Shipped a live, multi-tenant school platform spanning **9 modules** - attendance, exams and results, fees and payments, students, parents, staff, timetabling, announcements and reporting.
- Modelled tenancy as school groups containing branches, so records scope to a single branch while a group administrator still sees across all of them.
- Attendance edits and exam result disputes keep a full audit trail, so a corrected register or a challenged grade stays reviewable instead of overwriting the record.
- Built the dashboard as an installable PWA with its own service worker, on a NestJS and Prisma API over PostgreSQL, with a separate public landing site alongside it.

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Redux, Zustand, Tailwind CSS, AG Grid
Backend & APIs: Node.js, NestJS, Express.js, .NET Core Web API, Prisma ORM, REST APIs, WebSockets, JWT, RBAC
Databases & Caching: PostgreSQL, Microsoft SQL Server, MongoDB, Redis
Testing & DevOps: Vitest, unit & integration testing, Docker, CI/CD, Git, GitHub, Vercel
Engineering Practices: Requirements analysis, estimation, code reviews, debugging, production support, mentoring
AI & Automation: OpenAI API, Gemini, bulk PDF extraction, document intelligence, automation pipelines

EDUCATION & CERTIFICATIONS

BS Software Engineering - Virtual University of Pakistan Oct 2021 - Oct 2025
MERN Stack & Frontend Development - Jawan Pakistan Jun 2022 - Jun 2023
