Hammad Ali

Full Stack Software Engineer

Karachi, Pakistan | +92 349 187 2526 | ch.hammad2914@gmail.com | LinkedIn | GitHub | Portfolio

Full Stack Software Engineer with 3+ years of experience building enterprise ERP, SaaS and supply-chain platforms. Proficient in **React**, **Next.js**, **TypeScript**, **Node.js** and **NestJS**, with PostgreSQL and SQL Server on the backend. Delivered 7+ production systems end to end, built AI document extraction that cut processing time by 70%, and mentor junior developers.

Experience

Software Engineer May 2023 - Present

Interactive Technologies Gateway

- Own end-to-end delivery across **7+ enterprise systems** for supply-chain and quality-inspection clients, from React/Next.js frontends to Node.js/NestJS APIs.
- Design backend APIs in NestJS and Prisma ORM covering authentication, role-based access control and multi-module business logic.
- Migrated **3 legacy VB.NET systems** to React, Node.js and PostgreSQL, cutting UI load times by **40%**.
- Built Excel Genie, a reporting engine reused across **10+ ERP modules** in place of per-module reporting code.
- Created reusable React component libraries and NestJS service patterns, cutting per-module development time by **30%**.
- Run code reviews across the team before work is merged.
- Ship Docker-based services through CI/CD and resolve production issues across frontend, API and database layers.
- Mentor **4 junior developers** and own requirements analysis, estimation and planning with business stakeholders.

Full Stack Developer (Remote) Jun 2025 - Feb 2026

Consulting Service International Ltd

- Built client websites and web portals in React and Next.js, working remotely from requirements through to deployment.
- Delivered Law into Action, a live subscription regulations platform, across the full stack (see Projects).

Projects

Cortex - AI-Powered Apparel Sourcing & Export ERP | *React, NestJS, PostgreSQL, WebSockets, OpenAI, AG Grid*

- Built an ERP that takes apparel orders from booking and purchase order through planning, approvals, shipment, invoicing and payment, across **8 modules**, **100+ users** and 7+ permission roles.
- Built bulk AI extraction of purchase orders from PDF and Excel files, with review before commit, cutting processing time by **~70%** and overall order processing time by **at least 40%**.
- Added a vendor portal with a document hub, invoice and packing list creation in multiple formats, and debit notes, replacing scattered emailed files.
- Engineered AG Grid interfaces over **50,000+ row datasets** with no UI lag, and dashboards that update live over WebSockets.

Okulium - AI-Powered School Management SaaS (Own Product) | *React, NestJS, Prisma, PostgreSQL, Turborepo, PWA, Gemini* okulium.pk

- Lead developer in a team of 4 on a multi-tenant SaaS for single schools and multi-branch groups, covering QR attendance, exams and report cards, fees, timetables, staff HR and payroll.
- Modeled tenancy as school groups containing branches, so records scope to a branch while group administrators see across every branch.
- Fed staff attendance and leave directly into monthly payroll, and kept a full audit trail for attendance edits and exam result disputes.
- Built the parent app as an installable PWA, so parents get updates with no app store download.

Integra - Apparel Quality Inspection Platform | *React, Material UI, ApexCharts, React PDF*

- Built inspection workflows from booking to signed report: pre-production meetings, line and product checks, mid-production checks and final random inspections.
- Enabled inspections on weak factory networks: work is saved step by step and sent automatically when the connection returns, with no duplicate records.
- Replaced typed-up reports with automatically generated, signed PDF reports, and built customer, supplier and internal KPI dashboards.
- Modeled the reporting hierarchy for **50+ inspectors** through their managers and department head, including finance sign-off on conveyance claims.

Law into Action - Global Regulations Compliance Platform | *React, TypeScript, Express, Prisma, PostgreSQL* lawintoaction.com

- Built a live subscription platform showing businesses which regulations apply to them, with obligations, key dates, penalties and source documents in English and German.
- Added HS code lookup across the **10,300-entry** UN Comtrade classification, a CBAM carbon cost calculator, and an API that lets clients pull regulation data into their own systems.
- Built Stripe subscription plans with per-plan AI token allowances, an AI assistant, and weekly newsletters drafted by AI and reviewed before publishing.

Technical Skills

Languages : JavaScript, TypeScript, C#, SQL, HTML5, CSS3

Frameworks : React, Next.js, Node.js, NestJS, Express, .NET Core Web API, React Native, Tailwind CSS

Libraries : Redux, Zustand, Prisma ORM, AG Grid, Socket.io

Databases : PostgreSQL, Microsoft SQL Server, MongoDB, Redis

AI & Automation : OpenAI API, Gemini, agentic AI, Claude Code, document extraction pipelines

Tools : Docker, CI/CD, Git, GitHub, Vercel

Education

Virtual University of Pakistan Oct 2023 - Present (Expected Oct 2027)
Bachelor of Science in Software Engineering

Certifications

Agentic AI & FDE : Saylani Mass IT Training (SMIT) - 6-month program, in progress Aug 2026 - Jan 2027

MERN Stack & Frontend Development : Jawan Pakistan Jun 2022 - Jun 2023
