FRONTEND ENGINEER

Frontend Engineer with 3 years of experience building enterprise-grade ERP and SaaS applications. Specialized in scalable React architectures, complex data-driven interfaces, and performance-focused UI systems. Experienced in delivering production-ready solutions used across multiple business domains.

CORE SKILLS

React.js, Next.js, JavaScript (ES6+), TypeScript, Zustand, REST APIs, WebSockets, AG Grid, Node.js, Express.js, UI Architecture, Performance Optimization

PROFESSIONAL EXPERIENCE

Interactive Technologies Gateway
Frontend Engineer **May 2023 - Present**

- Led frontend development for 7+ enterprise ERP and web applications supporting international clients.
- Migrated legacy VB.NET systems to modern React architectures, improving UI performance by 80%.
- Built dynamic reporting systems (Excel Genie) reused across multiple ERP modules.
- Designed role-based dashboards, inspection apps, and workflow-driven interfaces.
- Developed high-performance AG Grid implementations with large datasets and real-time updates.
- Built secure vendor and merchant portals using JWT authentication and modular UI architecture.
- Implemented WebSocket-based real-time updates improving data sync by 40%.
- Established reusable component systems used across 10+ modules

PROJECTS

Cortex – AI-Powered ERP System

- Led frontend development for dashboards, order extraction, and time & action modules.
- Implemented scalable reporting and reusable UI components.
- mproved performance and usability across high-volume workflows.
- Tech: React.js, Zustand, AG-Grid, REST APIs.

OCULAS Vendor Portal

- Built secure vendor onboarding, approval workflows, and role-based dashboards.
- Integrated document workflows, approval cycles, and real-time data views.
- Delivered fully responsive UI with reusable components for scalable module development.
- Tech: React.js, REST APIs, JWT

Subscription Management System (Full-Stack)

- Developed a subscription tracking system with dashboards, payment logs, and renewal reminders.
- Designed backend architecture using Node.js, Prisma, and PostgreSQL with clean API layers.
- Added dynamic reporting and automated notification flows for expiring subscriptions.
- Tech: React.js, Node.js, Prisma, PostgreSQL

Integra – Quality Inspection App

- Implemented 5+ inspection workflows, KPI dashboards, and instant PDF report generation.
- Built multi-image upload with compression, chunked uploads, and optimized PDF export.
- Added notification flows and reusable inspection modules used across multiple production units.
- Tech: React.js, CompressorJS, WebSockets, react-pdf

EDUCATION

Bachelor of Software Engineering — **Oct 2022 - Present**
Virtual University of Pakistan

CERTIFICATIONS

MERN Stack Development — **Jan 2023 - Jun 2023**
Jawan Pakistan

Frontend Development — **Jun 2022 - Dec 2022**
Jawan Pakistan
