SOFTWARE ENGINEER

Software Engineer with 3 years of experience building enterprise-grade web and mobile applications using MERN/PERN stacks and React Native. Experienced in designing scalable architectures, RESTful APIs, real-time systems, and complex data-driven interfaces. Delivered production systems across ERP, SaaS, and supply-chain domains with focus on performance, security, and maintainable codebases.

CORE SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Zustand, Redux, AG Grid
Backend: Node.js, Express.js, Prisma, REST APIs, WebSockets, JWT Auth
Databases: PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Interactive Technologies Gateway **May 2023 - Present**
Software Engineer

- Led front-end development for 7+ enterprise ERP systems serving international clients across supply-chain and quality inspection domains.
- Migrated 3 legacy VB.NET systems to React architectures, reducing UI load time by 40% and cutting maintenance overhead significantly.
- Built Excel Genie a dynamic reporting engine reused across 10+ ERP modules, eliminating redundant report-building for each module.
- Engineered AG Grid implementations handling 50,000+ row datasets with real-time WebSocket updates and zero UI lag.
- Implemented WebSocket-based live data sync across dashboards, improving data freshness by 40% vs previous polling approach.
- Designed and enforced a reusable component system adopted across 10+ modules, reducing per-module UI development time by 30%.
- Collaborated on API design with backend team; independently built several Node.js service endpoints integrated into production ERP.

PROJECTS

Cortex – AI-Powered ERP System

- Led front-end for AI-powered ERP handling 50,000+ row grids with real-time updates across 8 interconnected modules.
- Built AI-powered bulk PDF extraction for invoices and purchase orders, eliminating manual data entry and cutting processing time by 70%.

Integra – Quality Inspection App

- Built 7 inspection type workflows with multi-stage approvals, instant PDF generation, and WebSocket live status updates.
- Delivered real-time KPI dashboard for managers tracking quality metrics across all inspection types, improving oversight and reducing quality escapes

Taskify Multi-Tenant SaaS Project Management Platform

- Built multi-tenant SaaS with JWT refresh rotation, HttpOnly cookies, and 3-tier RBAC zero cross-tenant data leaks by design.
- Engineered Socket.io real-time system + 5-state task machine with immutable deadline lock, preventing 100% invalid state transitions.
- Integrated Gemini AI report generation < 3s generation time

OCULAS Vendor Portal

- Built a smart vendor portal with automated PDF extraction and invoice/debit note generation—cut manual work by 70% and processing time by 50%.
- Implemented a centralized document system with automated workflows—handled 10K+ documents/year and improved accuracy by 60%.

EDUCATION

Bachelor of Software Engineering **Oct 2021 - Oct 2025**
Virtual University of Pakistan

CERTIFICATIONS

MERN Stack Development **Jan 2023 - Jun 2023**
Jawan Pakistan

Frontend Development **Jun 2022 - Dec 2022**
Jawan Pakistan
